LOCAL LISTING PORTFOLIO.

Be easier to find. Give nearby customers a reason to choose you.

LOCAL SEARCH. ACCURATE LISTINGS.

Google Business Profile optimization, consistent business details, citations and ongoing local visibility monitoring.

Search interface examples

Explore existing local-search records, alongside reference screenshots that explain the work.

WHAT IS A LOCAL LISTING?

Your business information, where local customers look for it.

A local listing is a business profile on a map, search engine or directory. It brings together the name, location or service area, phone number, hours, services, photos and reviews that help someone nearby decide whether the business is the right fit.

LOCAL LISTING MANAGEMENT

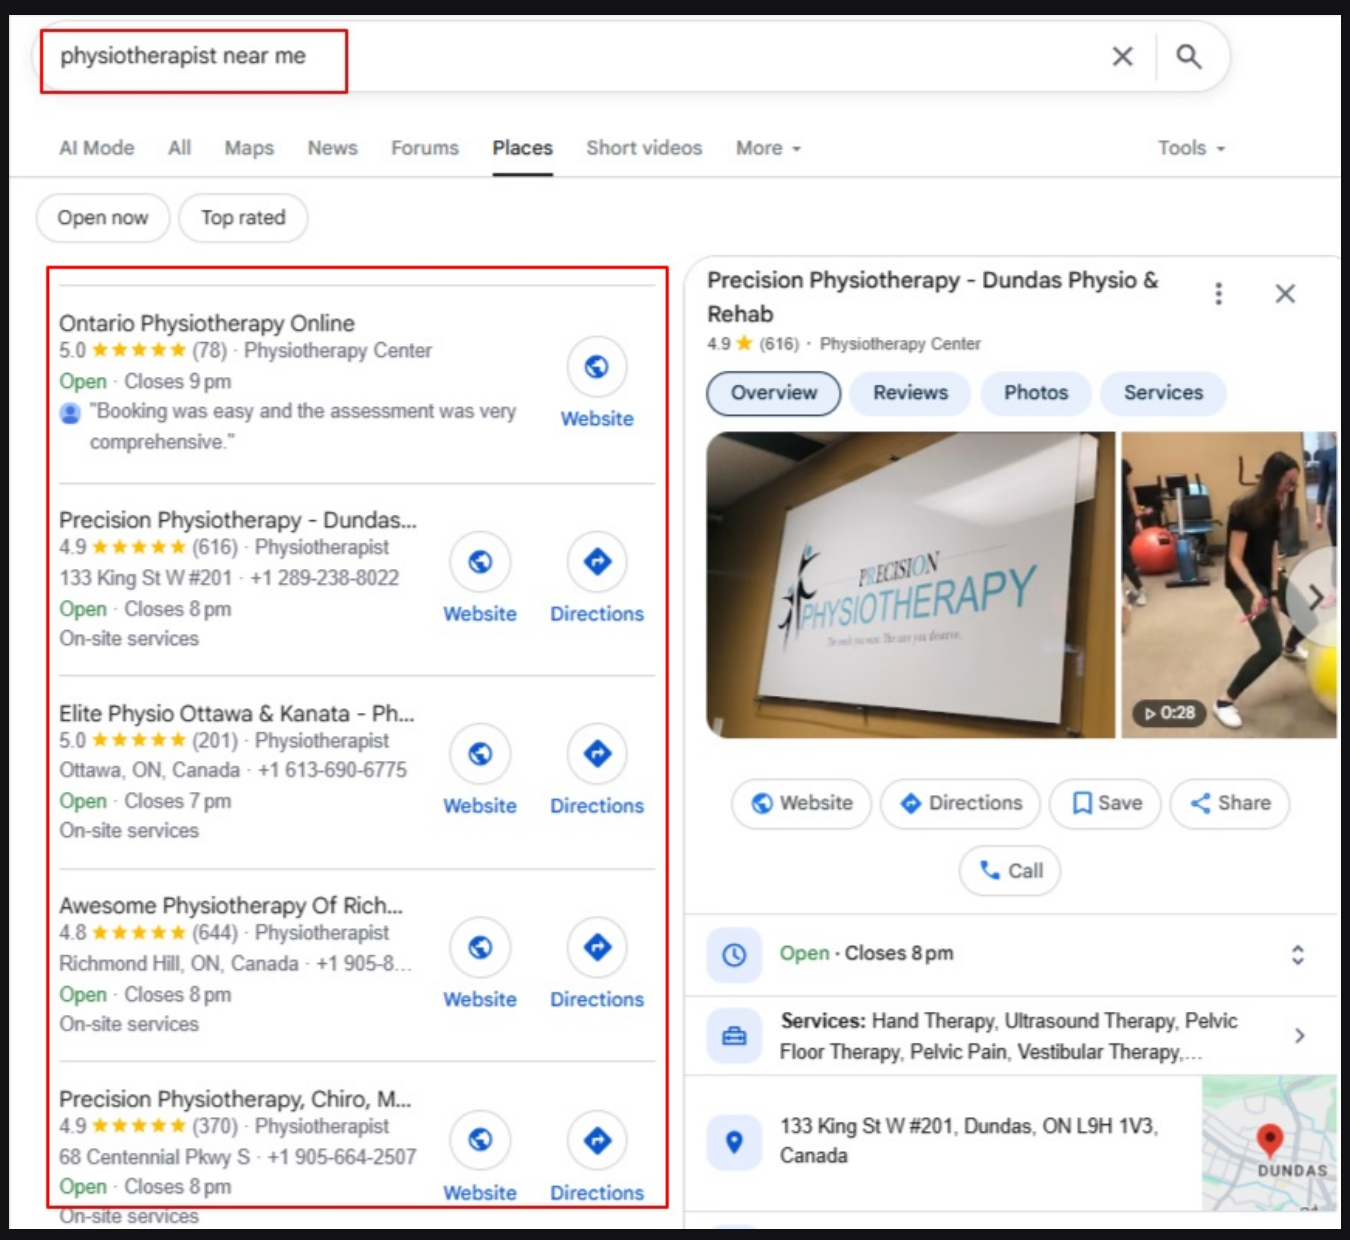

Claim and maintain eligible profiles, correct business details, resolve duplicates and keep important directories aligned. The question: can customers find the right information?

LOCAL SEARCH OPTIMIZATION

Connect profiles with useful local website pages, genuine reviews and relevant online mentions. The question: can the right local customers discover the business?

Storefront: help people visit the right location. Service-area business: explain where you work using an eligible profile setup. Multiple locations: keep each eligible location accurate and distinct.

HOW LOCAL LISTINGS HELP YOUR BUSINESS

Reference Google local-search interface / Not an additional client result

01 DISCOVER

Clear services, categories and location information explain when your business is relevant to a nearby search.

02 COMPARE

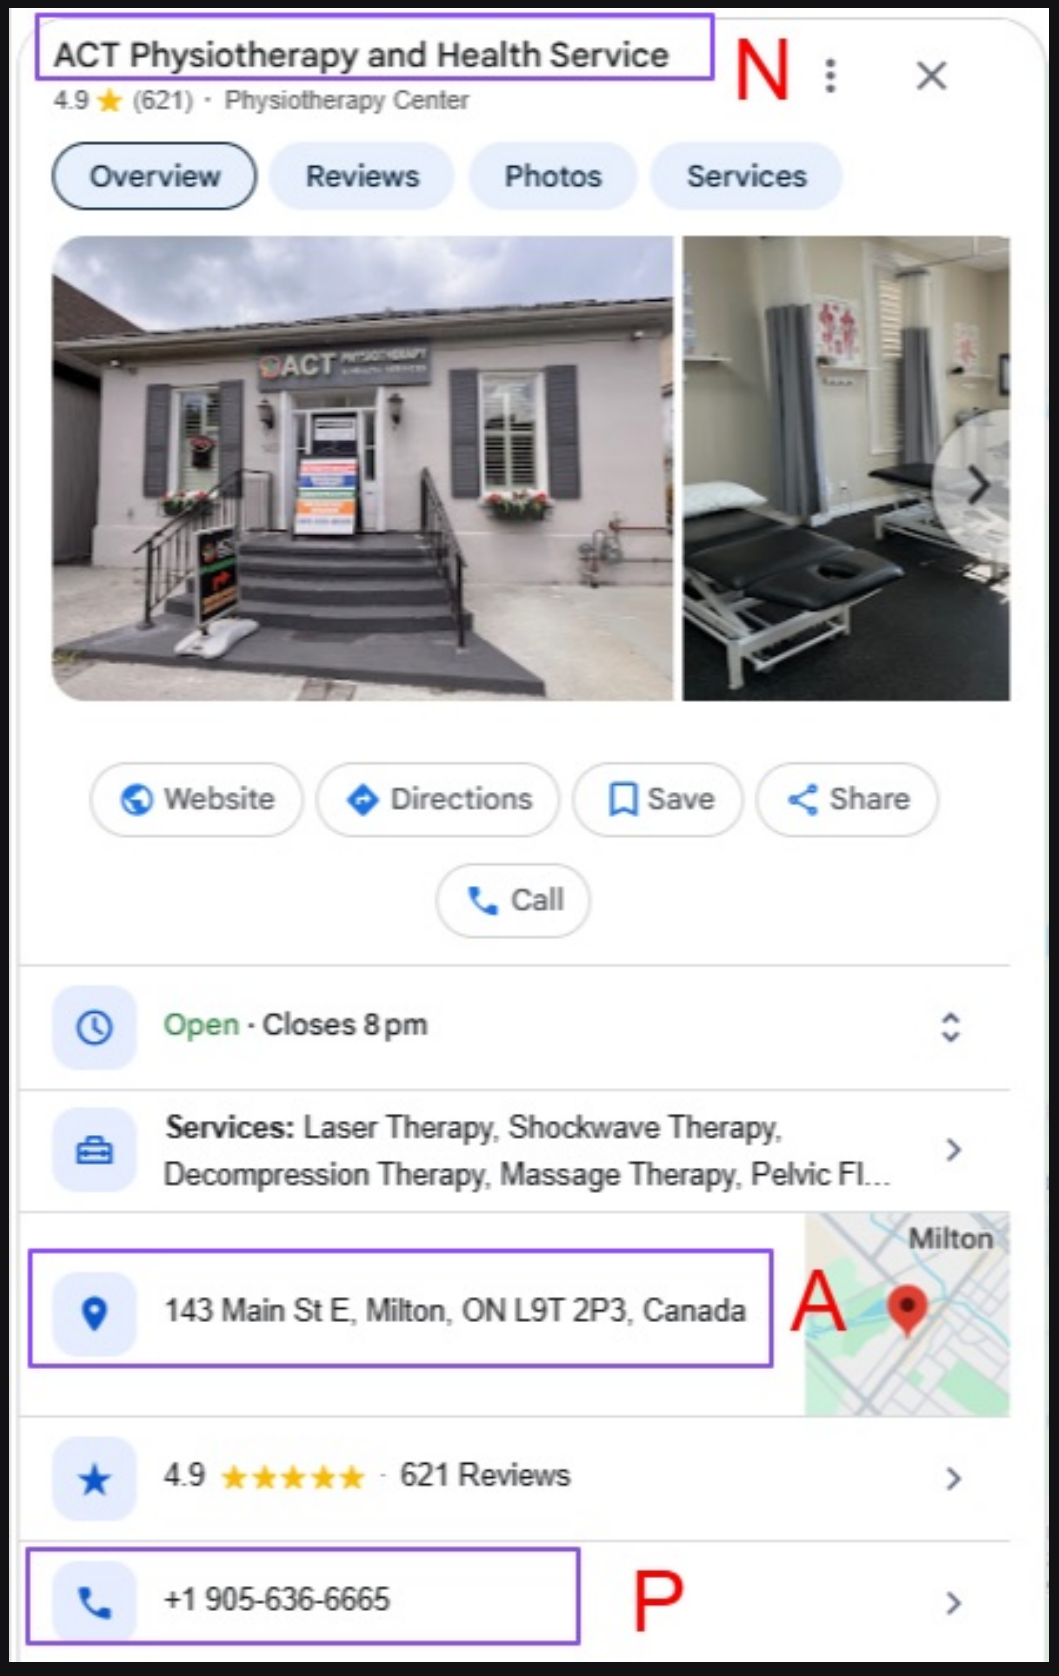

Current hours, useful photos and genuine reviews help customers assess their options before visiting a website.

03 TAKE ACTION

An accurate number, correct map pin and useful website destination make it simpler to call, visit or book.

NAP CONSISTENCY & LOCAL CITATIONS

NAP means Name, Address and Phone number. A citation is an online mention of those details, with or without a website link.

Name / Address / Phone highlighted in the supplied profile

FIND THE CONFLICTS

Old addresses, disconnected numbers and duplicate profiles can send customers to the wrong place. Compare key listings with a trusted business record.

RELEVANT MENTIONS

Focus on established maps, credible local directories and appropriate industry listings. Accuracy and relevance matter more than unrelated submissions.

KEEP DETAILS CURRENT

A move, phone change or new holiday hours should trigger updates across the places customers use. Document changes so maintenance is repeatable.

WHAT INFLUENCES LOCAL RANKINGS?

Google describes three main factors. Together, they explain why the same query can show different businesses across a neighborhood.

01 **Relevance**

How well the business matches the search. Appropriate categories, detailed services and useful local pages clarify the offering.

02 **Distance**

How far the business is from the searcher. Measure across nearby locations rather than treating one search as the whole service area.

03 **Prominence**

How well-known the business is. Reviews and other information about the business online contribute to the picture.

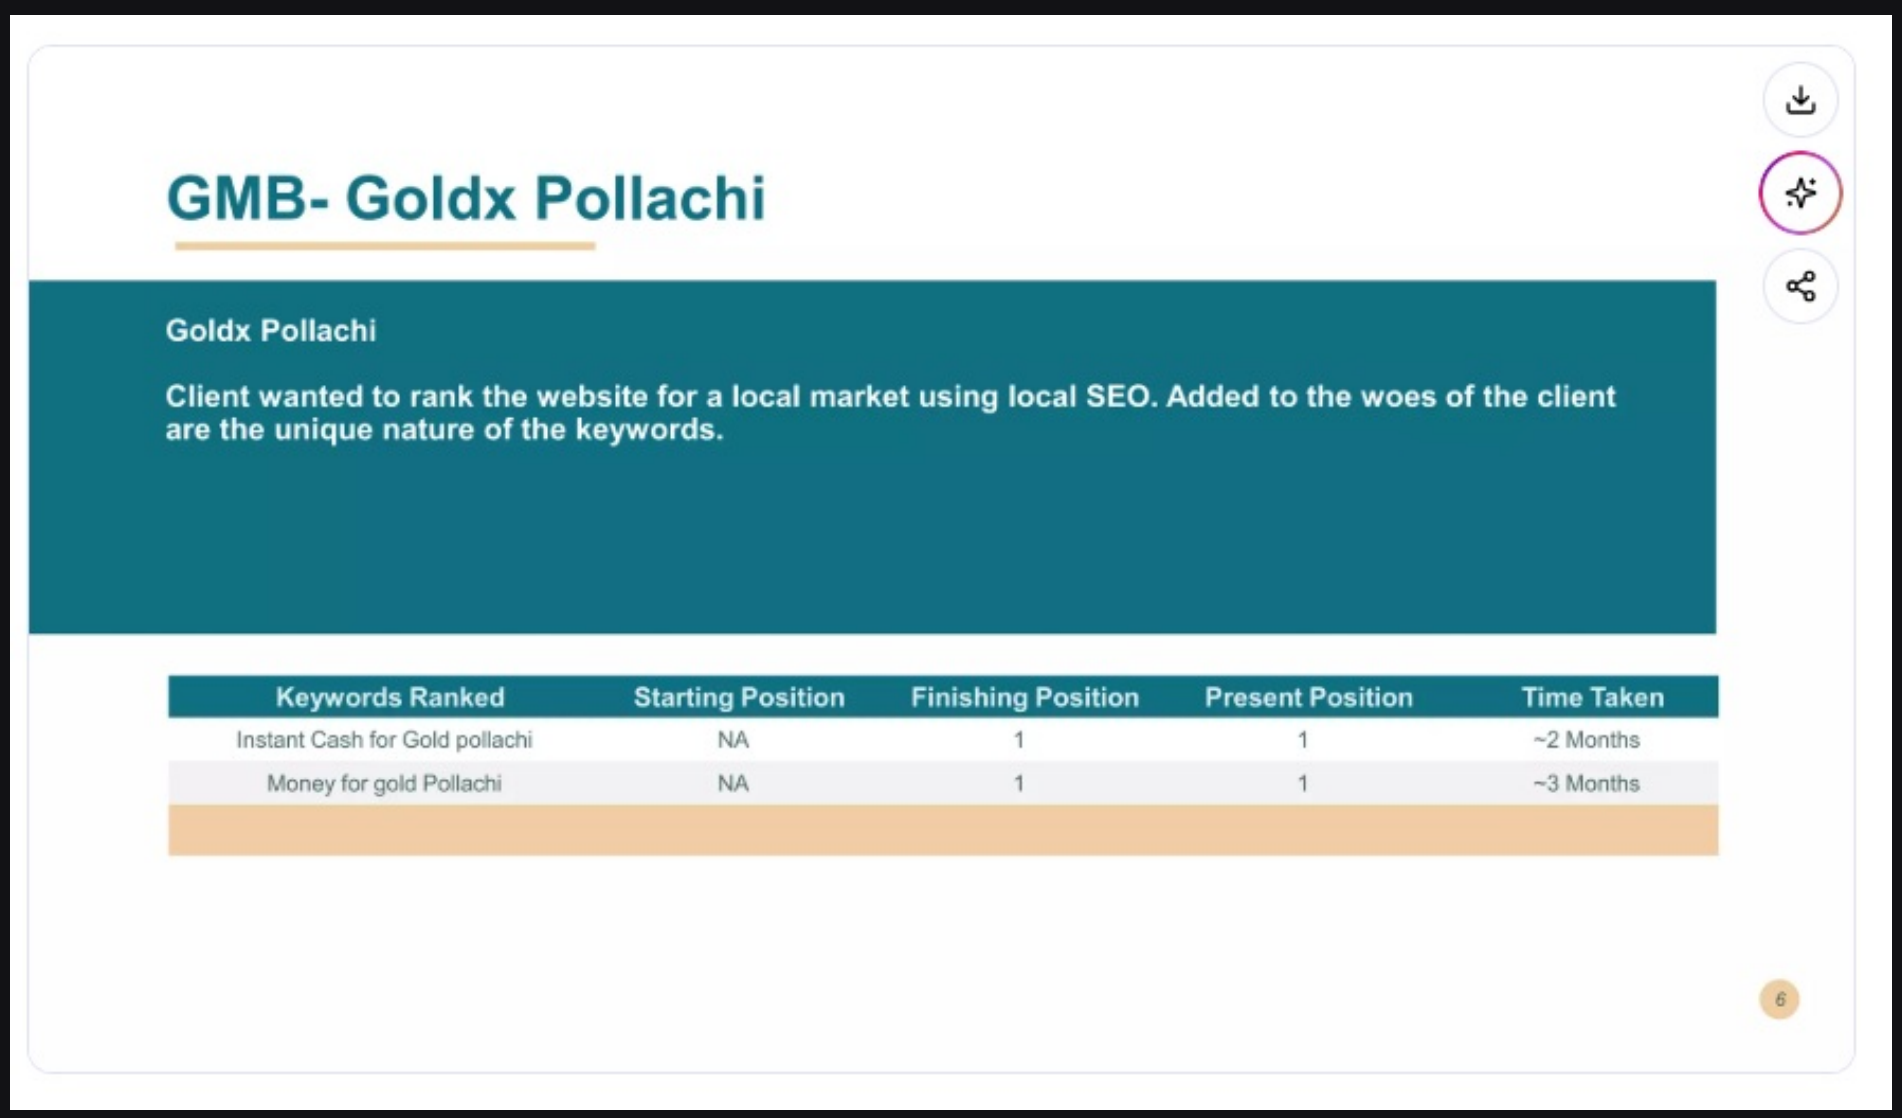

We improve the parts we can influence. A listing package cannot buy or guarantee a top organic Maps position.

GOLDX POLLACHI
LOCAL SEARCH RECORD

2 x #1

Two local queries at #1 in both the finishing and later recorded columns.

LOCAL QUERY	FINISH	LATER	TIME
Instant Cash for Gold pollachi	#1	#1	~2 months
Money for gold Pollachi	#1	#1	~3 months

GMB- Goldx Pollachi

Goldx Pollachi

Client wanted to rank the website for a local market using local SEO. Added to the woes of the client are the unique nature of the keywords.

Keywords Ranked	Starting Position	Finishing Position	Present Position	Time Taken
Instant Cash for Gold pollachi	NA	1	1	~2 Months
Money for gold Pollachi	NA	1	1	~3 Months

6

Starting positions and report dates were not supplied. The recorded timelines are approximately two and three months.

Historical ranking evidence. The records do not include call, sales or revenue data.

PRIME ORGANIC
LOCAL SEARCH RECORD

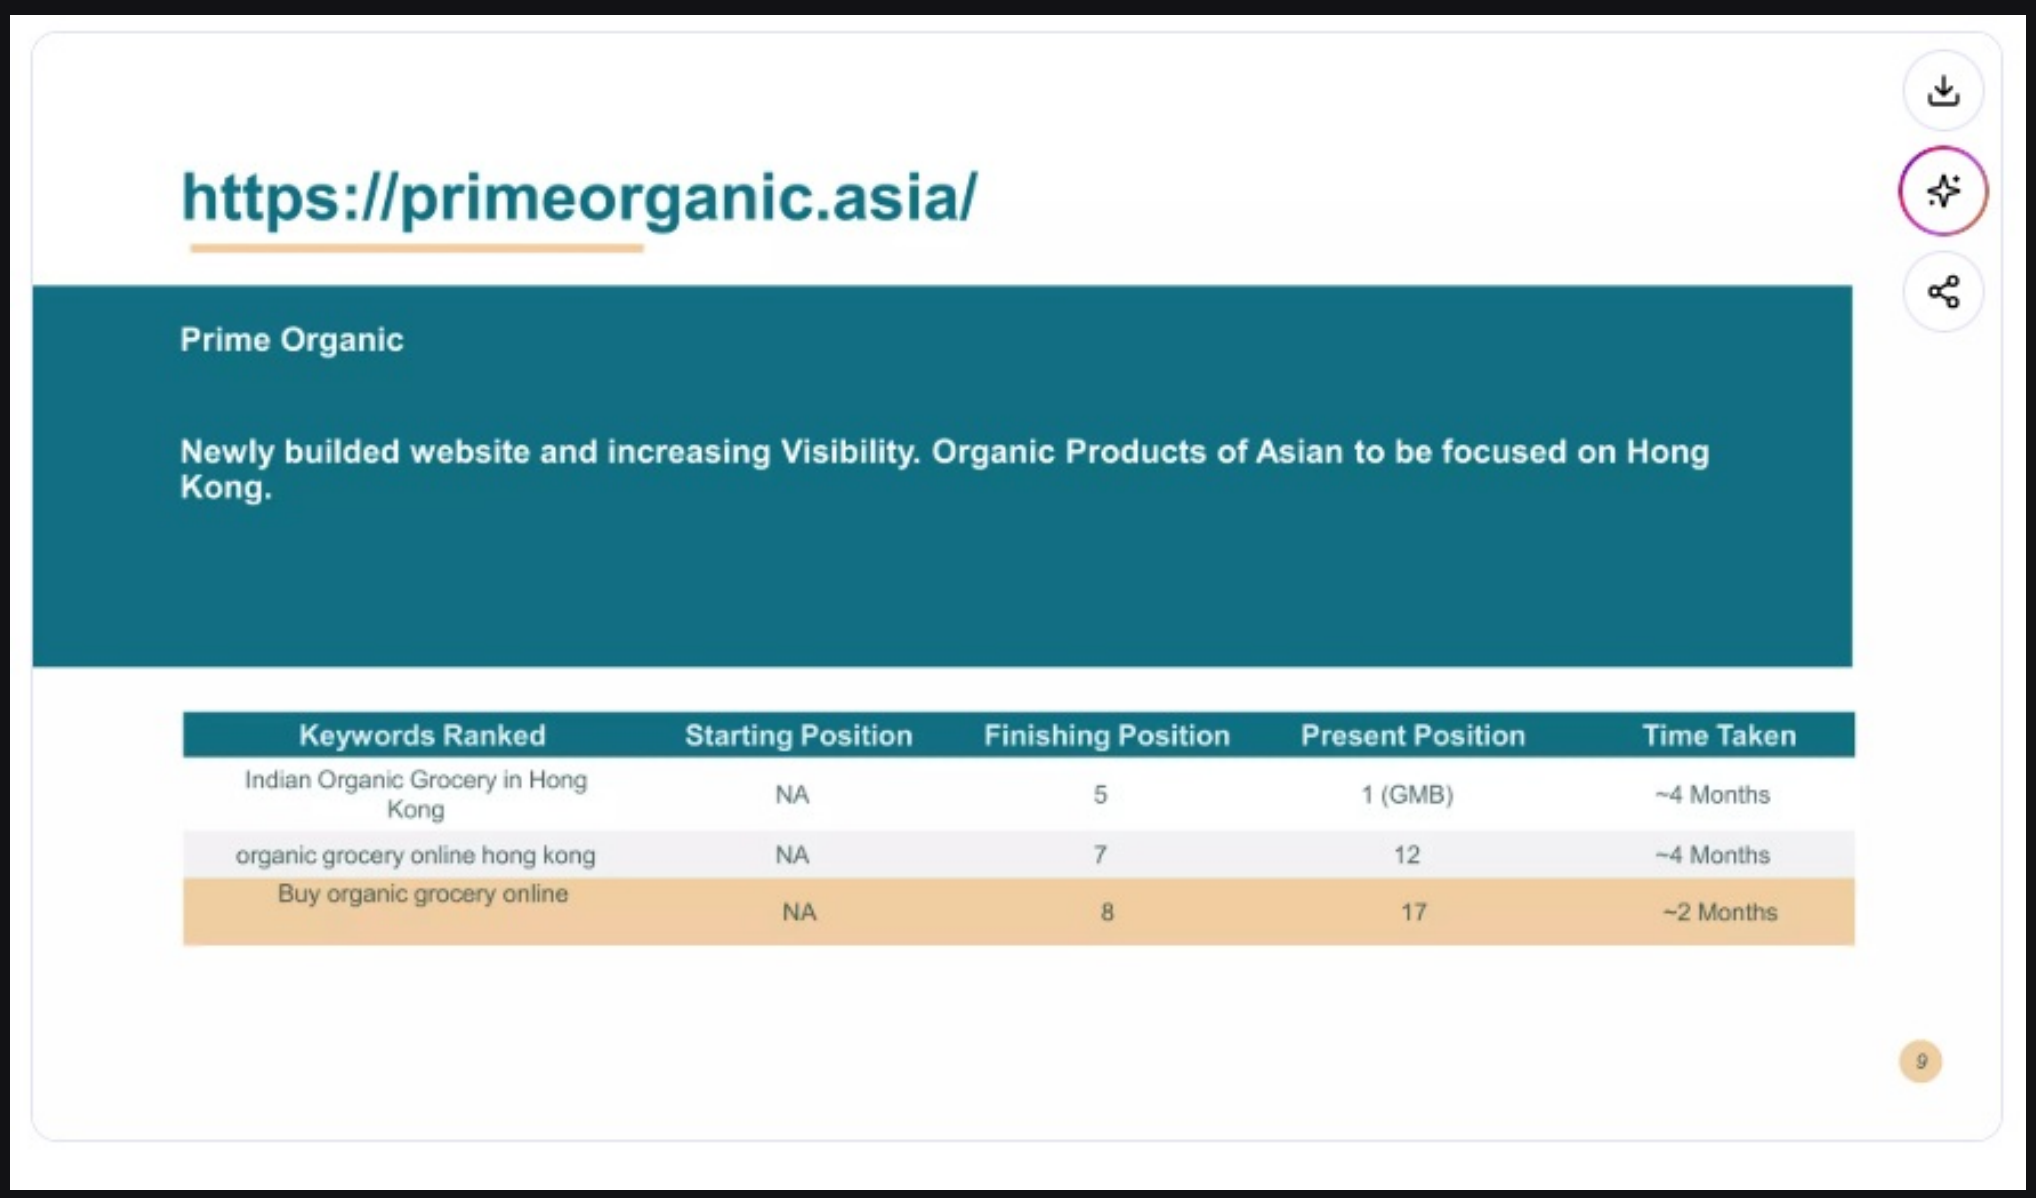

#1 GMB

Later local position explicitly labelled GMB in the original record.

LOCAL QUERY

Indian Organic Grocery in Hong Kong

Reported duration: approximately four months.

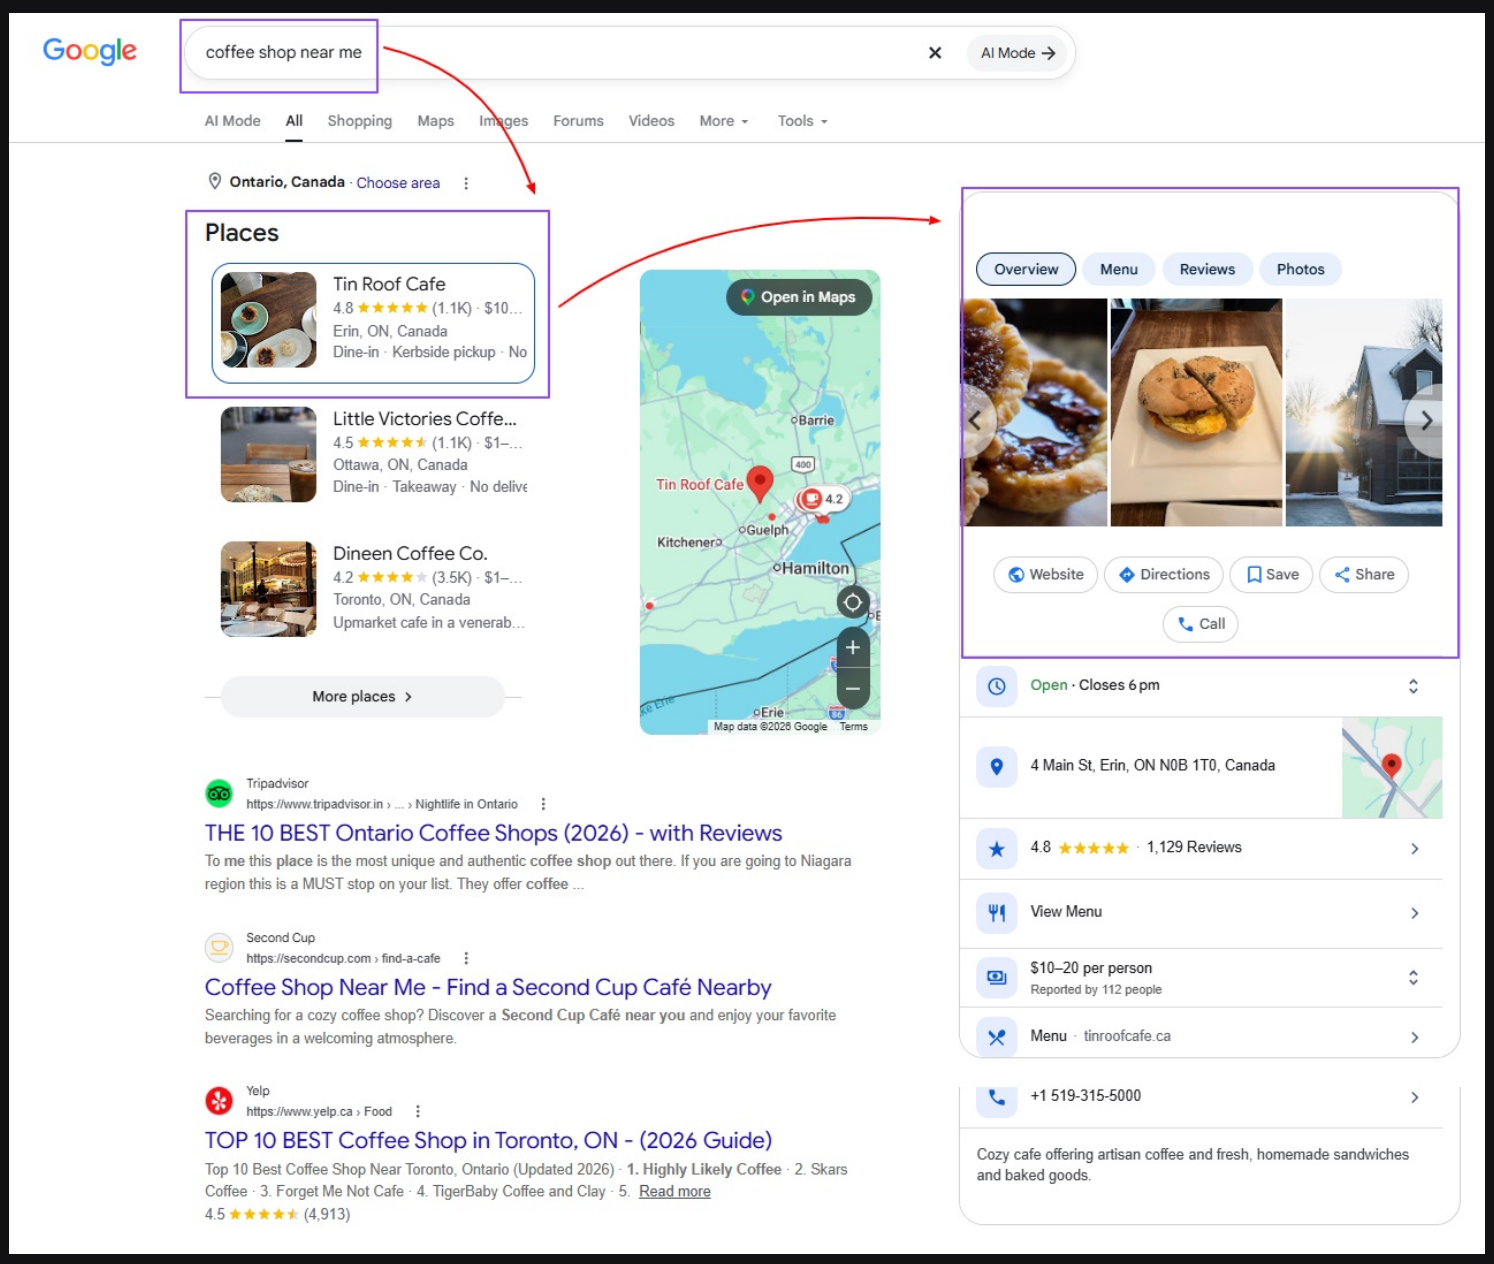

The local result is separate from the website positions elsewhere in the sheet. Report dates and starting positions were not supplied.

Historical ranking evidence. The records do not include call, sales or revenue data.

GOOGLE BUSINESS PROFILE & LISTING ACCURACY

Help customers understand what you do, where you operate and how to reach you.

Reference screenshot / Google local-search interface

Business profile

Review categories, services, opening hours, photos and customer-facing information.

NAP consistency

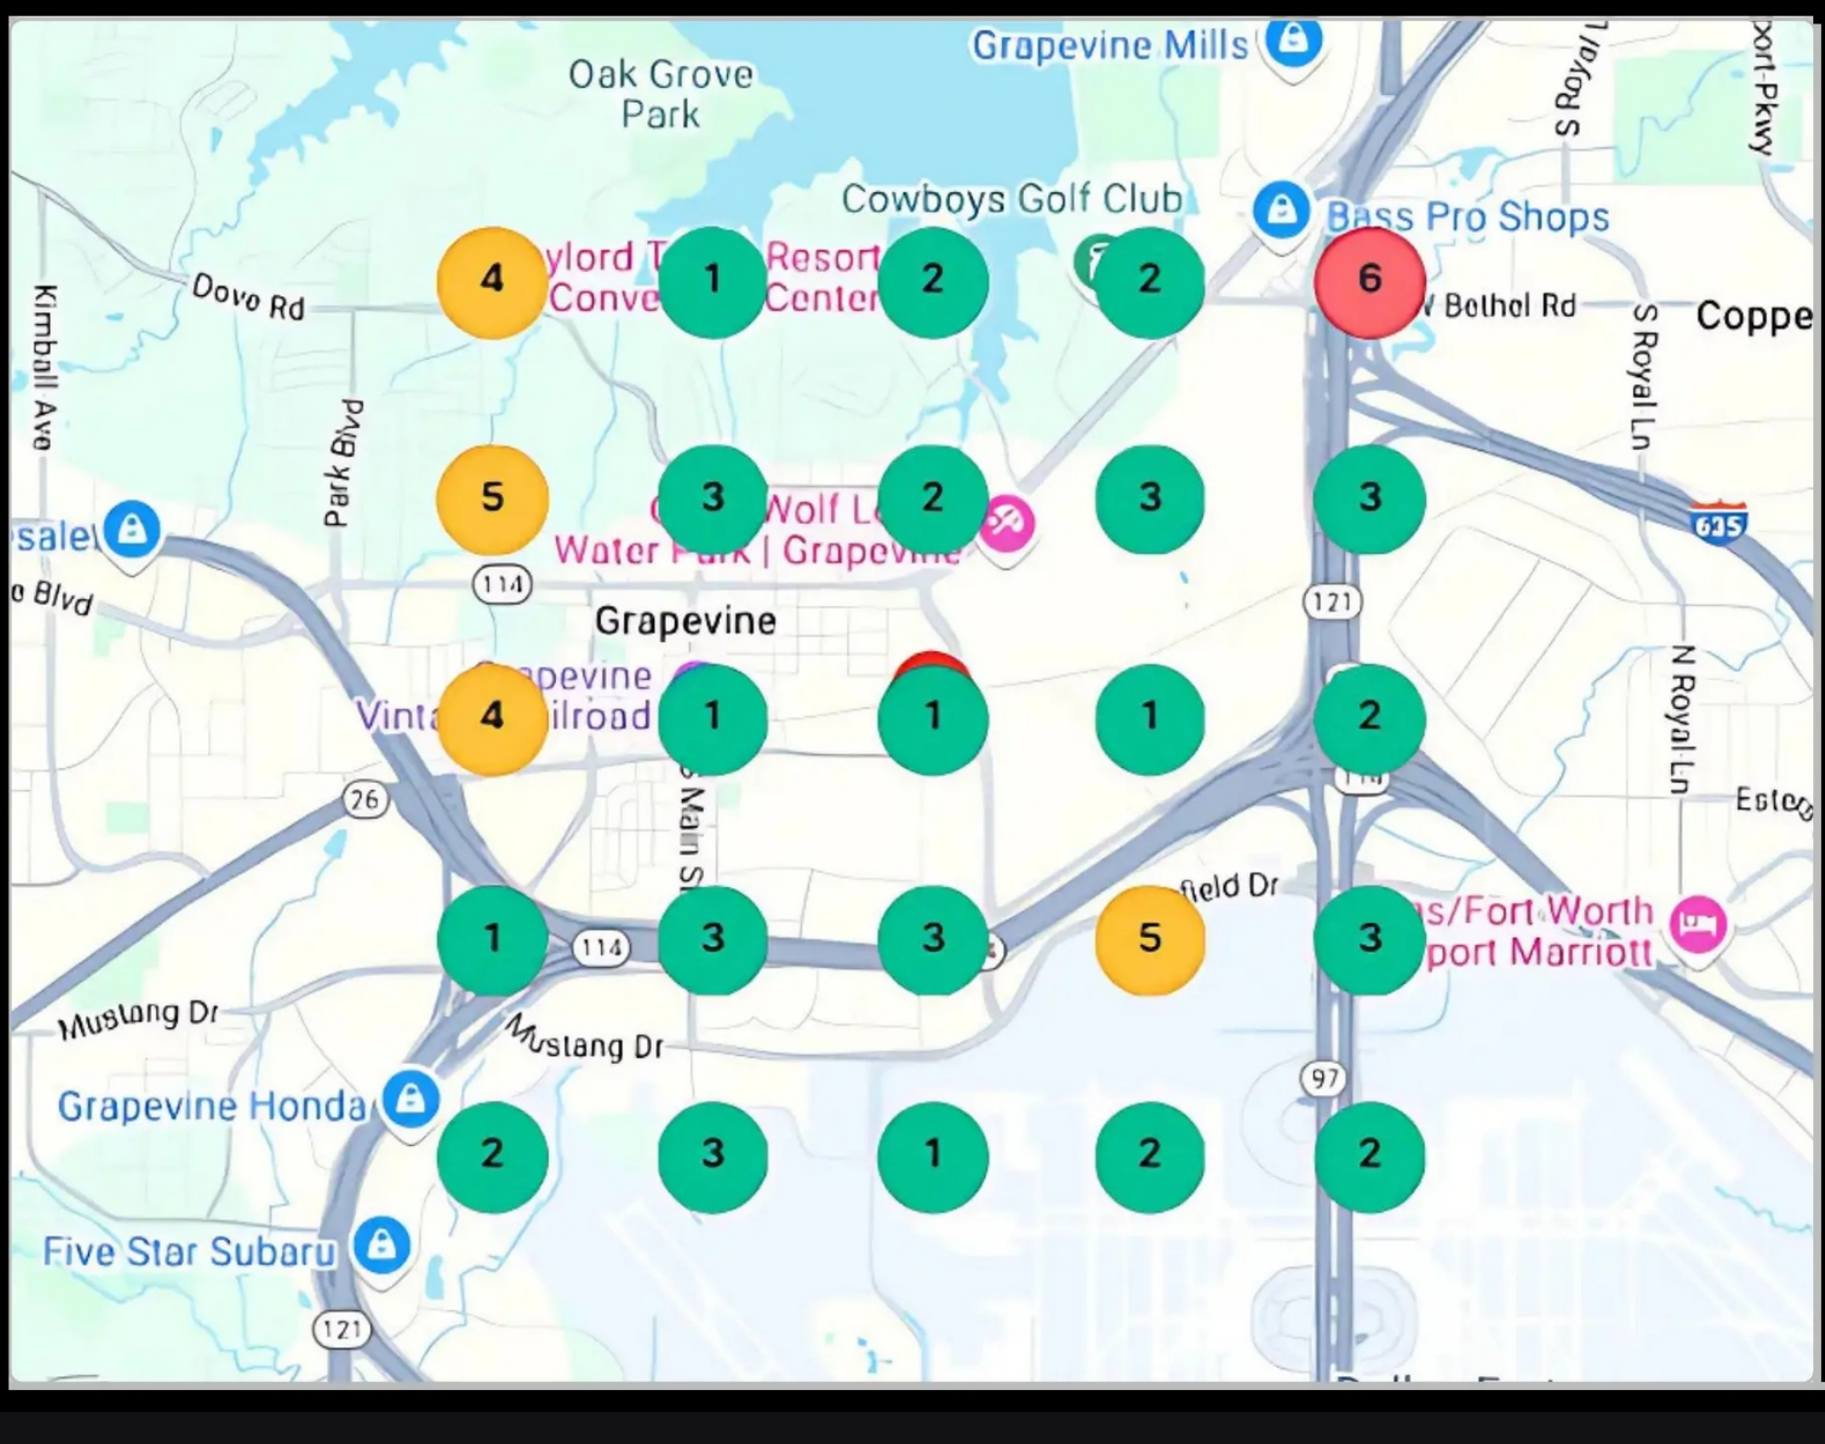

Align the business name, address and phone number across important touchpoints.

Reviews & reputation

Plan genuine review requests, useful responses and an ongoing update process.

MAP-GRID VISIBILITY

Review the same search from multiple nearby locations, then track the local pattern over time.

Reference map-grid report. These values are not a Pixel Growers campaign result.

01 / Set the area

Keep query, spacing and geographic coverage relevant to the business.

02 / Read the pattern

Identify stronger areas and coverage gaps across the map.

03 / Compare consistently

Repeat the same setup and document changes over time.

LOCAL DISCOVERY & ONGOING GROWTH

REVIEWS & REPUTATION

Genuine feedback helps customers compare businesses. Plan appropriate review requests and useful replies, without fake reviews, incentives or selectively asking only happy customers.

GOOGLE AI OVERVIEW

When the feature appears, Google can summarize information with supporting links. Align business facts and answer real service questions on accessible local pages. Standard SEO foundations apply; inclusion is not guaranteed.

LOCAL SERVICES ADS

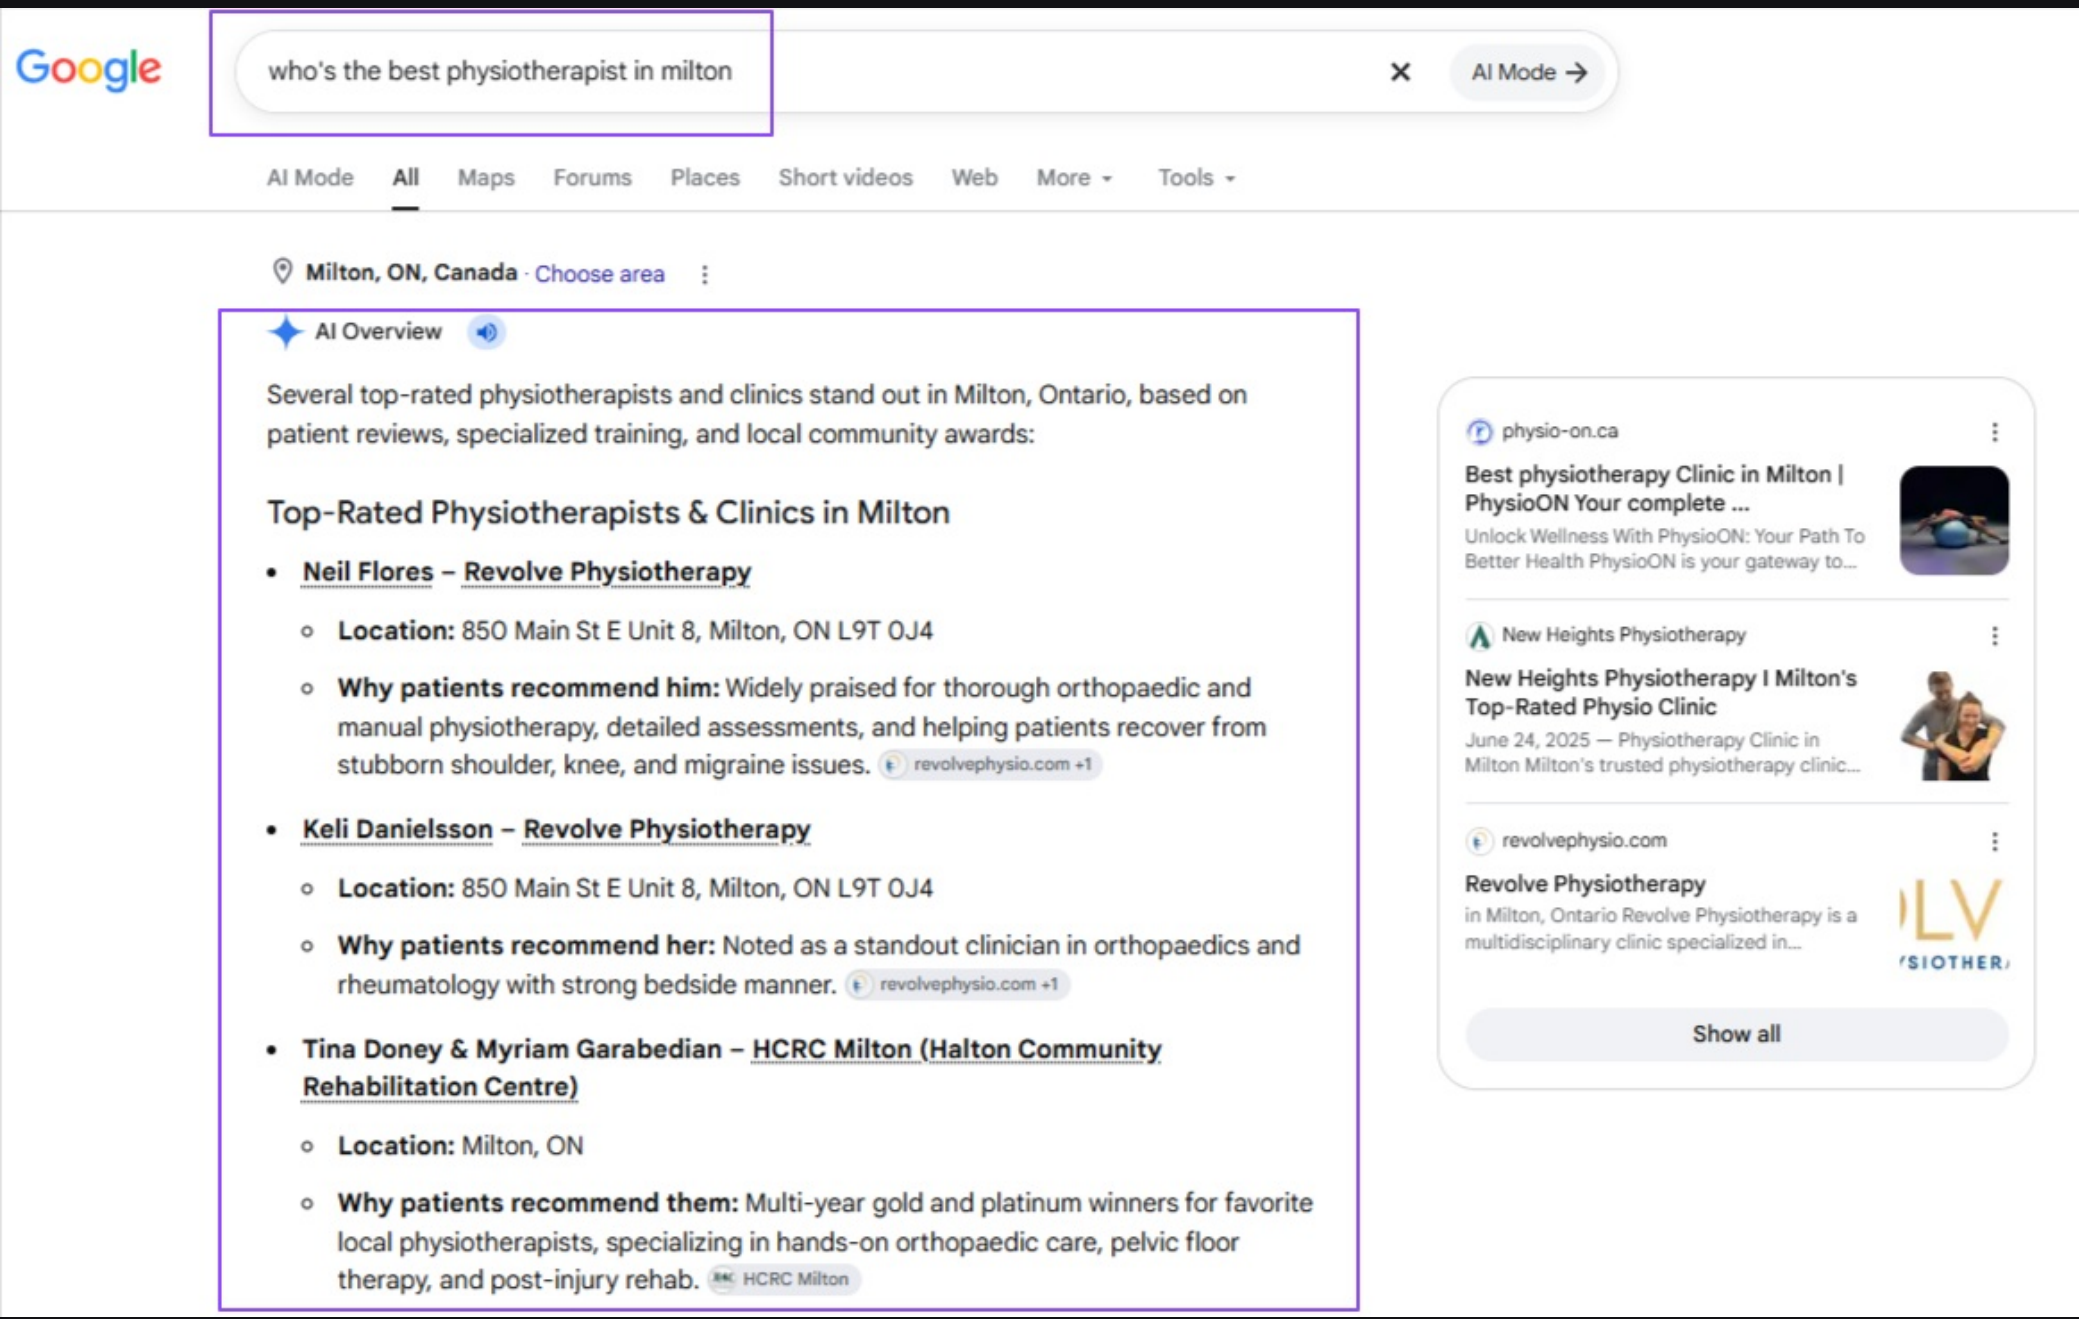

A separate paid channel for eligible service businesses. Review location and service eligibility, verification, budget and lead handling. Paid placements do not improve organic Maps rankings.

MEASURE WHAT MATTERS

Track visibility through local positions and map-grid coverage. Review available profile interactions. Connect enquiries and bookings to business outcomes when tracking is in place, rather than treating rankings as sales.

GOOGLE AI OVERVIEW

A search journey can begin with a generated answer and supporting sources, rather than a list of website links alone.

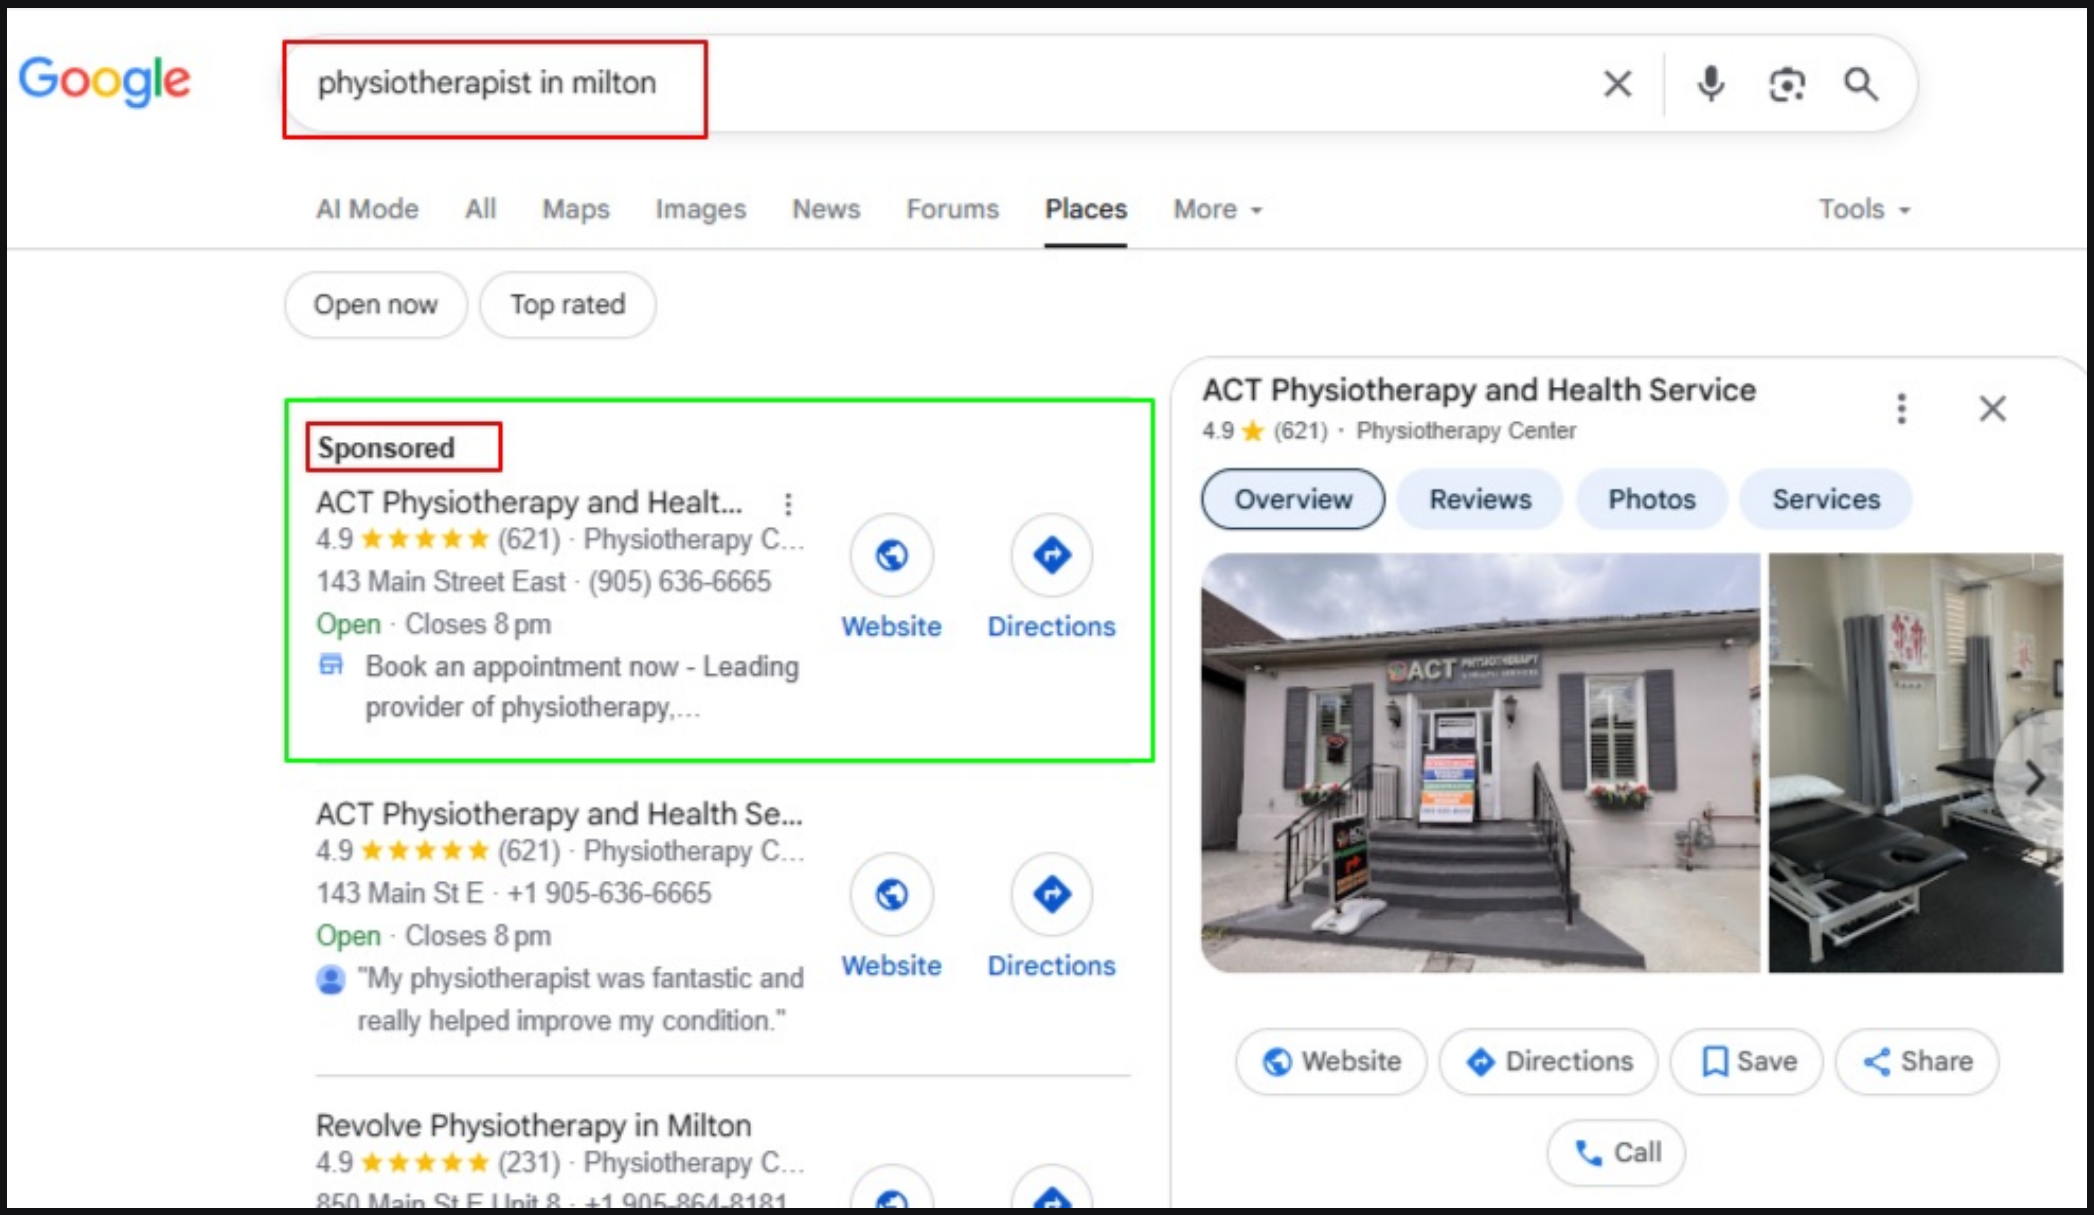

Supplied Google AI Overview screenshot / Milton physiotherapy search

Our approach: align business facts, answer real service questions on local pages and keep the website technically accessible. Standard SEO foundations apply; inclusion is not guaranteed.

LOCAL SERVICES ADS & PAID LOCAL REACH

Eligible service businesses can consider Local Services Ads alongside organic local-search work. Paid placements and organic rankings are separate.

Supplied screenshot / Sponsored local listing in Google Places

This screenshot illustrates a sponsored local listing, rather than the Local Services Ads lead format. Before recommending paid local activity, we review service and market eligibility, verification, budget and lead handling.

LOCAL LISTING
DELIVERY & NEXT STEPS

01 **Google Business Profile**

Categories, services, business details, photos and updates that accurately represent the business.

02 **NAP Consistency**

Keep the business name, address and phone number aligned across the website and important directories.

03 **Citations & Listings**

Review relevant directory mentions, correct conflicting details and address duplicate listings where possible.

04 **Reviews & Reputation**

Build a practical review-request and response process, with attention to genuine feedback and platform policies.

05 **Local Website Signals**

Connect service and location information to useful pages, clear contact details and appropriate business markup.

06 **Ongoing Monitoring**

Document listing changes, review local visibility and use the findings to prioritize the next improvements.
