META ADVERTISING SUMMARY

Historical campaign records. Meta summary: May 1-Aug 31, 2024; the spend caption separately references the last 60 days.

Paid Advertising Explained.

Two real formats, two different routes to discovery.

Search: respond to intent

A sponsored result connects a search query with an offer and a relevant destination. The click begins the journey; the conversion definition determines what is counted.

Social: introduce the offer

A Facebook or Instagram ad uses audience targeting and creative to introduce a product or service. Engagement, form submissions and purchases are different outcomes.

Reading the figures

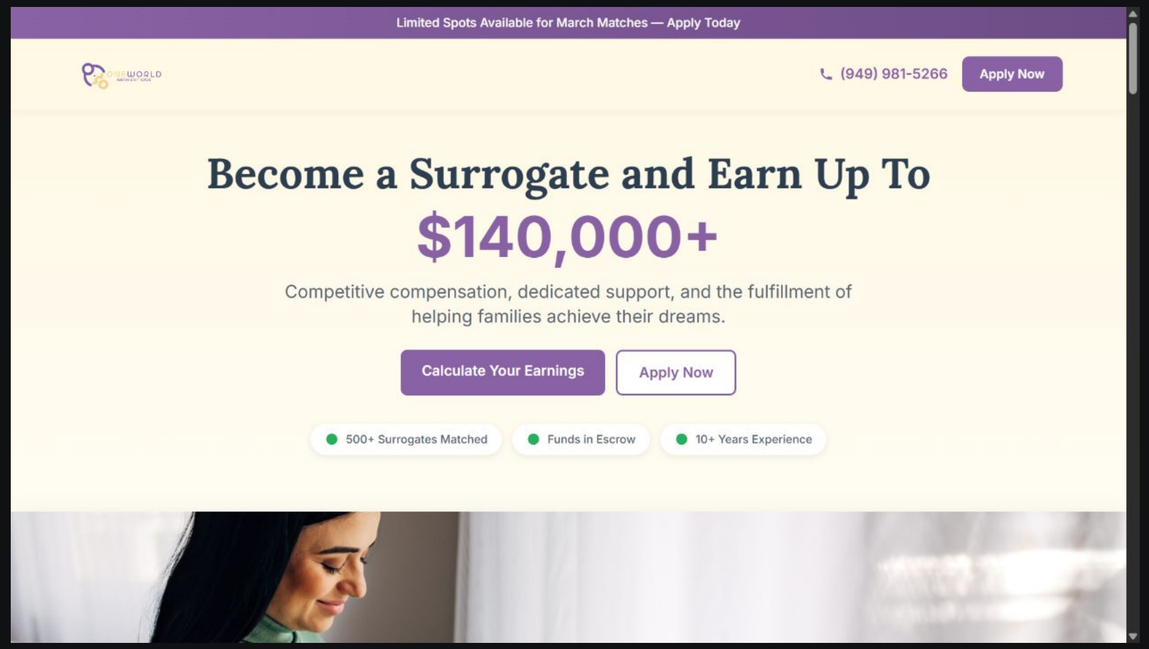

ROAS compares attributed sales value with advertising cost. It is not profit. Cost per lead divides ad spend by reported leads. A platform conversion can represent several kinds of action, so it is not automatically a sale.

Keep dates, currencies and campaign scope together when comparing performance.
